- Steps

- 1. Open **Settings** and enter the moderation dashboard if your role allows it.
- 2. Review the report reason, note, and related spot.
- 3. Dismiss invalid reports or remove the spot when needed.
- 4. Switch to the photo queue and approve or reject media submissions.

- Tips

- Resolve the queue in order unless there is an urgent trust or safety issue.
- Leave the public listing intact when the report is weak or unverifiable.
